### Review by Christine B. in Del Mar, CA

#### Project: Remodel or Renovate One or More Rooms

I know Francesco and his Team since a long time. They did many Improvements at my house in the past years. For this last project I was supposed to hire a company who was designed and recommended from the Insurance company because I had major leaks coming from the house siding and the the roof that has caused many problems all over to the inside interiors including a new kitchen. The previous company came over and gave me a quote but they didn't show up to start the work inventing excuses for the delay. I called Francesco at Quality Renovation Solutions and he came over right away, he matched the quote from the previous company and did way more work than work in the previous scope of work. They started the work within one week and completed the work with all of my approval. He involved me in many aspects of the work and when he discovered Major Problems coming from the siding and the roof he resolved the problems immediately with a very low additional price. If you are willing to do high Quality work with a fair price and with no Surprises and interruptions, you should hire Quality Renovation Solutions. Francesco is a very pleasure to work with.
